

Fugitive Dust Control Report
for
Sikeston Board of Municipal Utilities
Sikeston Power Station
November 29, 2019

1.0 DESCRIPTION

The purpose of this report is to fulfill the reporting requirements in accordance with the Code of Federal Regulations, Title 40 – Protection of Environment, Part 257 – Criteria for Classification of Solid Waste Disposal Facilities and Practices, Subpart D – Standards for the Disposal of Coal Combustion Residuals in Landfills and Surface Impoundments, Section 80 – Air Criteria (40 CFR 257.80).

Annual Fugitive Dust Control Reports (FDCRs) shall be placed in the on-site written operating record and maintained for five (5) years in accordance with 257.105(g)(2). The annual FDCRs shall be posted to the publicly accessible internet site (within thirty (30) days of placing in the on-site written operating record) and made available for at least five (5) years in accordance with 257.107(g)(2). Notifications of availability shall be sent to the Missouri State Director when the annual FDCRs have been placed in the facility's on-site written operating record (within thirty (30) days) and posted to the publicly accessible internet site (generally within thirty (30) days), in accordance with 257.106(g)(2).

The initial annual report must be completed no later than 14 months after placing the initial FDCP in the on-site written operating record. Deadlines for subsequent reports are one year after the date of the previous report.

2.0 REPORT

In accordance with 257.80(c) (Annual CCR Fugitive Dust Control Report), an annual report shall be prepared that includes a description of the actions taken to control CCR fugitive dust, a record of all citizen complaints involving CCR fugitive dust events at the facility, and a summary of any corrective measures taken.

2.1 Control Actions Taken

The following table summarizes the actions taken to control CCR fugitive dust at the Sikeston Power Station. The primary action involves the application of water from a pull-behind water tank. Daily observations were made to determine whether dusting was an issue or not. Dates not specifically listed in the table below were characterized as having either "No visible emissions" or "Precipitation, no dusting observed."

**Sikeston Board of Municipal Utilities - Sikeston Power Station
